- No Trans Fat
- Low Cholesterol
- Vegetarian
- 4 times lower carbon emissions
- 10 times less water consumption

WHAT IS IT?	WHY SHOULD I TRY THESE?	WHAT IS IT MADE FROM?	WHAT IS MYCOPROTEIN?	IS IT PLANT BASED?
Meatless protein similar to chicken.	It's a great Meatless option that offers meat like taste and texture and is Non-GMO, Soy-Free and better for the environment.	It's a combination of mycoprotein, yeast and egg whites (as a binder).	Mycoprotein is a natural protein made through a fermentation process similar to beer or yogurt.	No, it's not plant based, but it is a whole food that is healthy, minimally processed and better for the environment.
